

Product Change Notification—PCN# 000909
September 19, 2022

Dear Valued Customer,

We would like to inform you that Moxa is going to make changes to the OnCell 3120-LTE-1-AU Series. We want to ensure we have a more reliable supply of components, which will allow us to shorten the product delivery time. These changes will be implemented by November 30, 2022. Please review the details below to determine how these changes will affect your products and/or operations.

What will change?

Due to the shortage of cellular modules used by the OnCell 3120-LTE-1-AU Series V1.0.0, a new module will be used for the OnCell 3120-LTE-1-AU Series V2.0.0. The version number will be printed on the side label of the product.

There are two differences between V1.0.0 and V2.0.0:

- The new modules cover more LTE bands and support more regional certificates.
- The software functions are the same, but the firmware and configurations are not compatible.

Version	Cellular Module	LTE Band	Region Certification	Firmware
1.0.0	Thales ELS61-AUS	B3, B5, B8, B28	Australia: RCM Korea: KC	Supports v1.x.x
2.0.0	Telit L910C1-AP	B1, B3, B5, B8, B9, B18, B19, B26, B28	Australia: RCM Korea: KC Taiwan: NCC Japan: TELEC	Supports v2.x.x

Which products will be affected?

Product Name	Current Version	New Version
OnCell 3120-LTE-1-AU	1.0.0	2.0.0
OnCell 3120-LTE-1-AU-T	1.0.0	2.0.0

When will the new versions be available?

The new versions will be supplied as soon as the stock of V1.0.0 has been depleted.

Product Name	New Revision	Available for Order
OnCell 3120-LTE-1-AU	2.0.0	2022/11/30
OnCell 3120-LTE-1-AU-T	2.0.0	2022/11/30

If you have any questions, please email Yin Chang at YinY.Chang@moxa.com, or contact your regional sales representative.
